The Structure of Zendiwiki

In order to keep the Zendiwiki clear for users and to reduce the workload for authors and administrators, the overall structure is reduced to just a few sections at the top level. These are:

- Services
- Guides
- Teaching-Scenarios
- Blog
- +More

The individual sections themselves are not further subdivided hierarchically. They are structured in “blog style”: All posts are at the same level and can be accessed in the form of lists. (for the sorting criteria for the lists, see under TODO:).
