Media script

Competency

Script Media

Competency description

I can explain the importance of a script as a process flow description for digital media.

Level

Advanced competencies

Taxonomy level

1. Explain

Column/number in the document

A/39

Explanatory notes

A script serves as a process flow description that describes the structured process and the content elements of a digital media project.

Rationale

A good script helps organize the production process, guide creativity and ensure the desired result is achieved.

Example

An example of use would be if an educator explains to students how to create a script for a video or presentation.
