Competency description

I can evaluate the potential of digital teaching scenarios using different models (CAP, SAMR, ...).

Level

Advanced competencies

Taxonomy level

2. Apply

Column/number in the document

A/63

Explanatory notes

This competency refers to the ability to evaluate the potential of digital teaching scenarios using different models such as SAMR and ICAP.

Rationale

This competency allows educators to make informed decisions about how to integrate digital resources into their teaching.

Example

Using the SAMR model, an educator could determine whether tablets intended for use in the classroom are simply being used to replace pen and paper (S), or whether tablets enable transformative learning experiences that would not be possible without digital tools (R). .
