Content management

Competency

Content management

Competency description

I can structure my media-supported learning offerings sensibly and embed them in previous and subsequent content.

Level

Advanced competency

Taxonomy level

2. Apply

Column/number in the document

A/116

Explanatory notes

This competency refers to the ability to meaningfully structure learning content in a media-supported curriculum and to embed it in a context of previous and subsequent content. This promotes understanding of the learning material and shows the context.

Rationale

Structuring learning content can facilitate cognitive processing and learning.

Example

A Moodel course is designed to logically build on each other. The content is organized in such a way that it complements each other and enables a comprehensive understanding.
