Digital Resources

Competency

Digital Resources

Competency description

Prospective teachers will be able to conduct targeted and source-critical research, carry out media didactic analyses, create digital materials (including the use of digital tools) and consider legal aspects when using digital media and digital materials.

Limitations

on the „prerequisites/basics" that are necessary for successful „teaching and learning"/successful classes.

Level

Taxonomy level

Column/number in the document

Explanatory notes

Rationale

Concerns the process from research to the (technical) creation of digital materials.
