Educational problem

Competency

Educational problems

Competency description

I can develop a media-based solution for an educational problem.

Level

Basic competency

Taxonomy level

2. Apply

Column/number in the document

A/78

Explanatory notes

This competence describes the ability to develop a solution for an educational problem using media. Teachers should be able to use innovative approaches to respond to educational challenges and to design effective media-based solutions.

Rationale

In education, various problems may arise, whether in terms of access to education, quality of teaching or adaptation to different learning needs. The development of media-based solutions can help address these problems and improve the educational experience.

Example

A teacher notes that some of his SuS have difficulties understanding more complex mathematical concepts. To solve this educational problem, he developed a learning app in which step-by-step explanations and exercises are offered on these concepts. The app allows you to learn the SuS at your

own pace and offers additional support when needed.
