

Market, context and target group analysis

Competency

Market, context and target group analysis

Competency description

I can carry out market, context and target group analyses and take these into account when planning my media learning offer. (e.g. market analysis: Is there a media learning offer that I can access?).

Level

Basic competency

Taxonomy level

2. Apply

Column/number in the document

A/68

Explanatory notes

This competence refers to the ability to conduct an analysis of the market, context and target groups before a media-based learning offer is planned. This means that teachers should be able to analyse the educational market in order to determine whether there are already useful learning opportunities. In addition, the context in which the learning offer is to be used should be understood and the needs and characteristics of the target groups should be taken into account.

Rationale

A thorough market, context and target group analysis is crucial to ensure that a media-based learning offer meets the needs and that it is integrated into the teaching in a targeted manner.

Example

An English teacher wants to develop an online course for SuS of her middle school. Before she starts

planning, she looks at appropriate platforms and notes that there are many online English courses for your audience. They also take into account the context in which students learn and find that the SuS have limited access to certain resources. Based on this analysis, it decides to shape its course in such a way that it differs from existing offers and the course is accessible to all.
