

Media projects

Competency

Media projects

Competency description

I can use methods to support, guide and evaluate media projects.

Level

Basic competency

Taxonomy level

2. Apply

Column/number in the document

A/145

Explanatory notes

This competence describes the ability of teachers to plan, accompany and evaluate media projects in the educational environment.

Rationale

This competence enables educators to deal creatively with media and create their own digital products.

Example

A lecturer wants to create a subject specific to the subject of the students. To this end, it offers resources that are needed in the production process. The conclusion of this topic is a lecture presented by the students.

Sources

Teaching material

Link to other competencies

The competencies in the field of „media education“, „application competencies in information technology“ together provide an overview of the different dimensions of media education, which pedagogues can observe in order to promote the media competence of their students.

Tagging

Media education, media project, teaching design, media production, student activity.
