Selection capability

Competency

Selection capability

Competency description

I can show learners how they can select from the wide range of media on offer to satisfy their own needs.

Level

Basic competency

Taxonomy level

2. Apply

Column/number in the document

A/150

Explanatory notes

This competence describes the ability of educators to teach students how to select the digital content that is most relevant to their needs from a range of digital content on offer.

Rationale

There are many offers circulating in the digital media. A critical eye is important here to avoid wasting unnecessary resources on an unsuitable offer.

Example

Research work could be planned as part of a project. Strategies can be taught first, for example to ensure that the sources are credible. This competence can then be iterated as the project progresses.

Connection with other competencies

The competencies that fall under the area of „media education“ - problem-solving skills„ enable educators to provide students with the knowledge and skills to use the media to solve problems.
